

আজকের LinkedIn টাস্ক এর জন্য আপনাকে নিচের কিছু কাজ করতে হবে।
যা করতে হবে, -

১. আপনার যদি LinkedIn আইডি না থাকে তাহলে আপনাকে একটা নতুন লিঙ্কডিন আইডি রেজিস্টার করতে হবে।
(আগে লিঙ্কডিন আইডি থাকলে আপডেট করলেই হবে)

২. LinkedIn আইডির লিংক কাস্টম করতে হবে। এবং সম্পূর্ণ LinkedIn টি আপনার আপডেটেড তথ্য সহ সাজাতে হবে।

৩. LinkedIn প্রোফাইল আপডেট হয়ে গেলে আপনার LinkedIn কাস্টম লিংকটি টাস্ক হিসেবে সাবমিট করতে হবে।
সাবমিট করার ক্ষেত্রে মনে রাখবেন, অবশ্যই কাস্টম লিংক শেয়ার করতে হবে।

লিঙ্কডিন প্রোফাইলে যে সকল বিষয় থাকতে হবে -

Profile Basics

- **Profile Photo:** Upload a **high-quality, professional** headshot. The background should be **neutral** and you should wear **clean attire** (no selfies or party pictures).
- **Background Photo:** Add a **relevant banner image**, like a tech-themed design, abstract code graphic, or personal logo/banner.
- **Headline:** Write a compelling headline that reflects your expertise and in which field you want to work.
- **Contact info**
- **Custom URL:** Edit your LinkedIn URL to make it clean:
 - **Example:** [linkedin.com/in/yourname](https://www.linkedin.com/in/yourname)

2. About Section

Use bullet points for clarity. Highlight the following:

- Personal Engagement
- Technical Expertise
 - (e.g., “Skilled in developing web applications using React, Node.js, and Express.js”)
- Career Achievements
 - (e.g., “Completed 10+ real-world projects including e-commerce and dashboard apps”)
- Passion & Goals
 - (e.g., “Eager to contribute to open-source and work on scalable backend systems”)
- Contact Info

- Include email, portfolio URL & phone number with country code at the bottom.

3. Experience Section (If you Have Any)

- List relevant roles with detailed descriptions:
 - **Title:** Web Developer (or specific role, e.g., Frontend Developer).
 - **Achievements:**
 - Include quantifiable outcomes (e.g., "Increased website speed by 40% using optimized code").
 - Mention specific projects with live links and technologies used.
 - **Responsibilities:** Focus on skills and impact, not just duties (e.g., "Redesigned UI for a SaaS platform using React, increasing user engagement by 20%").
- Include freelance or open-source projects if you have any.

4. Feature Section:

- Add at least 2 features

5. Skills

- Add at least 10–15 key skills:
 - Programming languages (e.g., JavaScript, Python).
 - Frameworks/libraries (e.g., React, Angular).
 - Tools/technologies (e.g., Git, Docker, AWS).
 - Interpersonal skills
 - Additional Skills if you have any.

6. Projects Section

- Showcase at least 2 key projects:
 - Provide project names, brief descriptions, and the technology stack.
 - Include links to live demos, GitHub repositories, or portfolios.
 - Key features- highlight 3 to 4 main features of your project.
 - Add skills
 - Add home page screenshots
 - Live URL

7. Certifications (If you have any)

- Add relevant certifications, such as:
 - FreeCodeCamp

- Coursera (e.g., Web Development with React)
- Google's UX Design Certificate
- AWS Certified Developer
- Include issuing organizations and completion dates.

8. Education (only focus on your last education)

- Mention academic background, focusing on relevant fields:
 - Degree (e.g., Bachelor's in Computer Science).
 - Relevant coursework or projects completed during studies.

Note: If you are a student of school or college please avoid the education section.

9. Languages

- Add all the languages you know to the proficiency level.
 - Example: Bangla , English , Hindi etc.

10. Volunteer Experience (Optional but Recommended)

If you've participated in any community or social projects:
